

86" Wi-Fi Interactive Flat Panel

50 simultaneous touch points LED ULTRA HD

Integrated touch | Infrared technology | Integrated Microphone
Ambient light sensor | 15Wx2+20Wx2 Integrated speakers
Bytello Share license included | USB Type-C Full-Link 100W

HX8610

IFP 86" X SERIES WI-FI + WALL MOUNT

Google EDLA  Android 15

65" 75" **86"**

Zero Gap Technology allows sharper images with better contrast and reduced glare.

Automatic brightness adjustment via ambient light sensor.

Infrared technology touch screen; usable even with gloves or any other solid object.

Anti-glare tempered glass with Mohs 7 4mm thickness.

Integrated 15Wx2 and 20Wx2 stereo speakers. Total power 30W + 40W

4x HDMI IN, 1x USB Type-C Full-Link 100W, 1x USB Type-C Full-Link 15W, 4x USB 3.0, 1x USB 2.0 OTG, 2x TOUCH OUT, 1x Display Port, 1x RS232, 2x LAN (RJ45 - Autoswitching)

CPU Octa Core A76x4+A55x4
8GB RAM, 128GB ROM
OPS Standard slot

SI07B Wi-Fi and Bluetooth module included

Bytello 

HELGI C PRO series displays are ready for integration with Bytello AI functions*

Education

The display adapts to the classroom environment, turning each lesson into an engaging experience.

Corporate

A tool aligned with corporate needs, enhancing brand image and style even during presentations.

Business

Custom-designed environments - from welcoming hotel guests to enhancing communication at the point of sale.

What are the benefits of Zero Gap Bonding?

Zero Gap Bonding technology represents a key evolution for next-generation interactive displays. By eliminating the air gap between the protective glass and the LCD panel, this solution delivers a sharper and more natural viewing experience, with brighter colors and superior contrast even in well-lit environments. The absence of internal reflections significantly improves content readability and

reduces eye strain. Moreover, the direct contact between glass and panel makes touch input more accurate and responsive, providing the feeling of writing directly on the surface. Zero Gap Bonding therefore means higher image quality, optimal usability, and greater device durability—ideal for both educational and professional applications.

High readability

Excellent visibility even under direct light, for distraction-free work.

Optimized contrast

Richer colors, reduced reflections, and consistently vibrant images.

Ultra-precise touch

Instant and natural response to touch, for smooth and accurate interaction.

USB Type-C Full-Link

Recharges **43%** in just **30 minutes**

USB Type-C Full-Link technology uses a USB 3.2 Gen 2x2 connection with transfer speeds of up to 20 Gbps, simultaneously using two 10 Gbps lanes.

AN INTERFACE FOR EVERY NEED

With a single cable it is possible to transfer 65W charging power, Audio and Video signals up to 4K, touch output from the display to the computer, and network connection between the display and compatible devices.

ALL THE CONNECTIVITY YOU NEED
IN A SINGLE CABLE

LAN In/out

Autoswitching

Two RJ45 ports

The Autoswitching system allows you to connect the Interactive Display, the OPS PC (not included), and any compatible external device intuitively through the integrated bidirectional ports, without the need for external switches.

1000Mbps for **maximum speed**
Internet connection

App

Note

The Note app, pre-installed in the built-in Android operating system, is designed as a powerful and intuitive tool for creating and presenting interactive lessons rich in multimedia content.

Fully integrated with the monitor's multitouch function, Note allows you to write and draw with your fingers or any solid object, create diagrams and charts, insert videos and images, and save lessons in image or PDF format: the ideal tool to innovate traditional classroom teaching and engage students.

Wide range of freehand writing tools

Configurable workspace to adapt to everyone's needs

Screen recording function to replay and share lessons

Advanced drawing tools, extensive library of interactive and multimedia content

Create customized assessments

Turn your smartphone into a learning tool!

Thanks to the AirClass 2.0 app, students can connect to Note and take part, using their smartphone, in quizzes, tests, and polls, with real-time feedback.

AirClass 2.0

INCLUDED

Software

Note^{Plus}

Note Plus software is the advanced version of the Note app included in the monitor's Android operating system, designed to be used with a Windows PC, either the integrated OPS or an external computer. Note Plus includes a wide library of advanced tools for creating and presenting lessons rich in interactive content: handwritten mathematical formula recognition, tools for technical drawing and the simulation of physics and chemistry experiments, text-to-speech, the ability to insert hyperlinks, and much more.

Subject-specific teaching tools

PowerPoint presentation import

Text-to-speech

Hyperlinks

Advanced drawing tools

Compatible with PowerPoint, Note Plus allows you to create an unlimited number of slides, enabling lessons to be built in an organic and structured way. The included perpetual license also gives teachers and students the opportunity to download and install the software on their personal PCs, allowing them to prepare lessons and review them at home.

Software

Capture

Capture software for Windows is the ideal solution for blended learning and flipped classrooms. Its advanced video and audio capture and editing tools—including the valuable function of recording audio directly from the PC—allow teachers to prepare highly engaging multimedia lessons, with the possibility of sharing them with students.

Video recording

Capture the entire screen, a selected area, or external sources such as webcams and document cameras. Capture provides everything you need to create professional content easily and intuitively.

Audio recording

Capture allows recording from a microphone, external devices, or directly from the system, with the option to import external files.

Video editing

Cut, edit, add text, images, audio, and watermarks. Work on unlimited tracks and export in MP4: everything you need for complete editing in a single platform.

PERPETUAL LICENSE
INCLUDED

App

Bytello Share

The Bytello Share app, pre-installed in the built-in Android operating system, enables wireless content sharing from any device regardless of the operating system, allowing real-time audio and video sharing from connected devices. The split screen function also supports the simultaneous connection of up to nine devices.

PERPETUAL LICENSE
INCLUDED

App

Bytello Class

Bytello Class is a browser-based application that allows teachers to create interactive and engaging lessons with writing, annotation, and collaboration tools. Accessible from any device and integrated with cloud services such as Google Drive and OneDrive, it enables easy management of documents, quizzes, and activities in real time.

INCLUDED

Bytello AI

Integrate **Artificial Intelligence** into HELGI interactive displays

The exclusive Bytello AI feature—available by subscription and integrated into the monitor's Android operating system—offers a set of Artificial Intelligence tools designed to take the user experience to the next level.

SUBSCRIPTION PLAN

Smart Pen

Built-in microphone

Real-time translation of any multimedia file

Control the monitor with the pen

AI

Circle & GO

Perform smart searches on any content displayed on the monitor. Simply circle an element on the screen to activate AI search and get all the information you need.

AI Analysis

Automatic description of circled content

Image

Visual suggestions and related images

Exercise

Instant resolution of mathematical calculations

Video

Videos relevant to the selected content

Image generation

Create images from a text prompt in illustrated book, realistic, and 3D styles

Ask AI

Let the AI answer any question written or dictated using the smart pen

Concept maps

Write a word and let the AI automatically generate an expandable concept map based on the starting term. An essential tool for any educational context.

Create detailed concept maps automatically in just a few seconds

An indispensable tool for brainstorming and summarizing

Real-time Subtitles

With AI support, Bytello can subtitle any video - whether local or online - in real time.

Automatic Translation

Translate texts and video content in real time, from any language.

AI painter

With a single touch, transform any freehand drawing into a masterpiece in vector format.

Smart calculator

This feature allows you to write calculations freehand, convert them into editable text, and get the result.

AI Analysis
Instant solution of mathematical calculations

Handwriting recognition
Handwritten formulas are converted into editable text

Video summary

Bytello AI automatically and in real time creates a summary of any video content.

Timestamping
Summaries are linked to an exact timeline

Subjects
Summaries can be grouped by topic

Multilingual
The tool supports videos in any language
