Connection

Connect with external display device

5

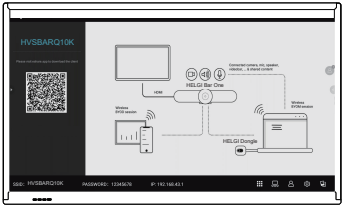

Connect with touch screen

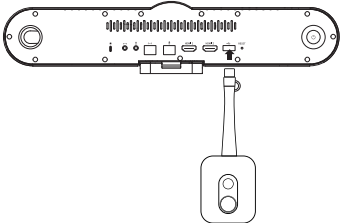

6

Pairing the Dongle (First-Time Use)

1. When powered on, the indicator light will turn blue, and the main interface of the HELGI Bar One will appear on the screen.

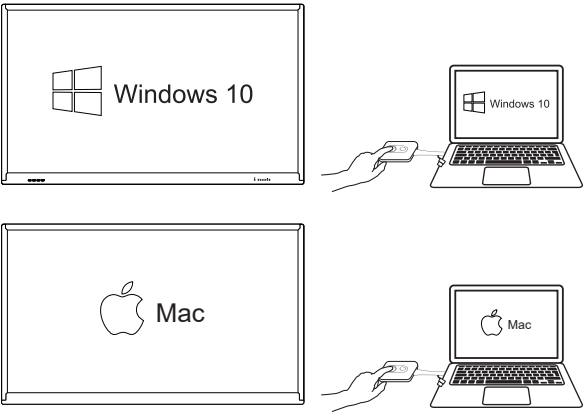

2. The HELGI Dongle should be paired with the HELGI Bar One. Plug the HELGI Dongle to the USB port of the HELGI Bar One. It will pair automatically. Remove the HELGI Dongle after successful pairing.

7

Using BYOD (Wireless Screen Sharing)

Plug the HELGI dongle into the Type-C port of a PC (Windows or Mac), then press the Share button to share the screen.

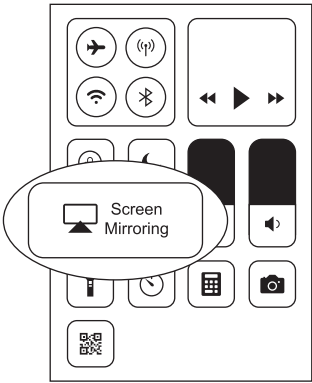

8

Mobile Casting

iOS Casting

1. Make sure the iPhone/iPad and HELGI Bar One are connected to the same network, or use the hotspot of the HELGI Bar One.
2. Select screen mirroring (Airplay protocol), select the HELGI Bar One device and share the iPhone/iPad screen to the display device.

9

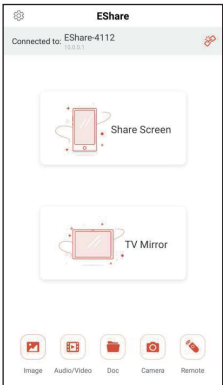

Mobile Casting

Android Casting

1. Make sure android phone/pad is under the same network with HELGI Bar One or use the hotspot of HELGI Bar One.
2. Scan the QR code to download the app.
3. Run app, select the HELGI Bar One and share the phone/pad screen to the display device.

Download EShare
