New didactic methodologies make it necessary to reorganize the layout of the class in short times, in order to satisfy the most various learning needs, while ensuring maximum safety of students and teachers. In order to satisfy these needs, we have designed a modular solution complete with desks and ergonomic chairs suitable for circular workstations made of multiple desks.

3.0 class furniture are able to adapt to the different needs of today's school: from single stations for the classic frontal lesson to multiple island, horseshoe or linear configurations, capable of accommodating groups of 2, 4, 6 or more students and perfect for collaborative activities.

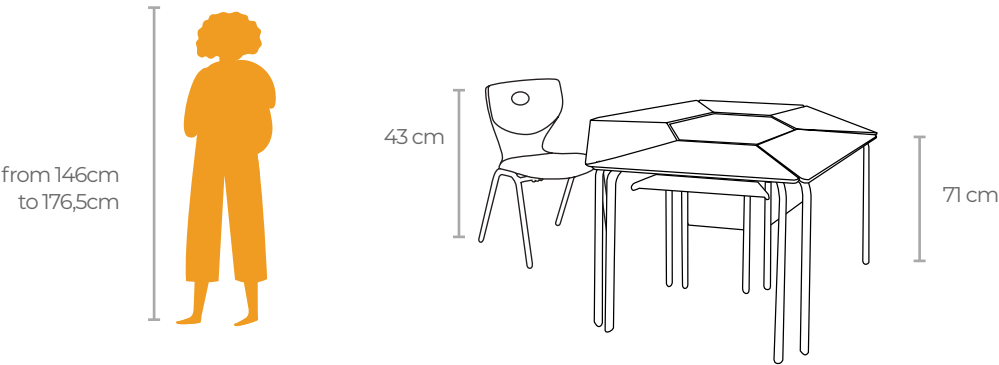

All the desks are available with different heights to meet the different statures of students and meet both the CE safety regulations and the requirements established by the Legislative Decree n. 81/2008. They are also certified as UNI EN 1729-1:2016.
