Warranty

Compatible product

With all rechargeable devices

Up to 24 VR Visors - Headsets - Accessories

Structure

All-metal frame with natural air circulation, 4 swivel casters equipped with brakes and two plastic side handles to conveniently move the cart where needed.

Front compartment for housing devices equipped with security lock and double retractable door in the body of the unit.

Upper compartment with security lock and servo-assisted opening/closing system with double gas piston.

Rear compartment for housing power supplies, equipped with double doors with security lock.

Power and Charging

Rear compartment not accessible from front and top compartments, equipped with grommet holes to connect devices to power supply.

Equipped with four strips of 9 sockets each and compartment for transformer placement.

Control unit for simultaneous power timing on all outlets or in timed sequence to avoid overloading.

Single 5m power cable built into the power pack.

Housing and charging

Three fixed shelves with 12 removable plastic dividing bulkheads equipped with built-in grommets for housing devices in an upright position.

Sterilizer with 3 UV lamps (one per floor) adjusted automatically by closing the front compartment.
Sterilization cycle duration 30 min.

Removable divider bulkheads, as per instructions below. Removing the partitions allows the cart to be adapted for charging and sterilization of all types of devices, including accessories such as VR viewers and headsets (by way of example).

Compatible product

With all rechargeable devices

With three simple steps, the dividing bulkheads can be removed to adapt the Omnichart 36 charging cart to any need.
