

Assembly instructions

PKD1001

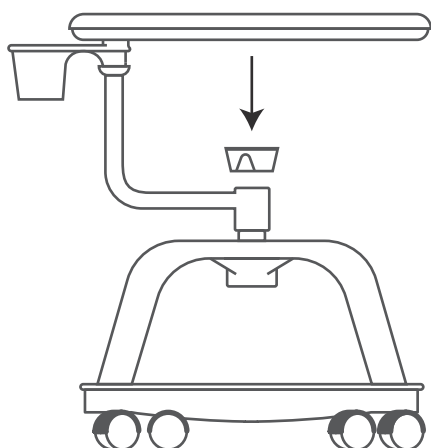

- 1** Stabilize the base on the ground.

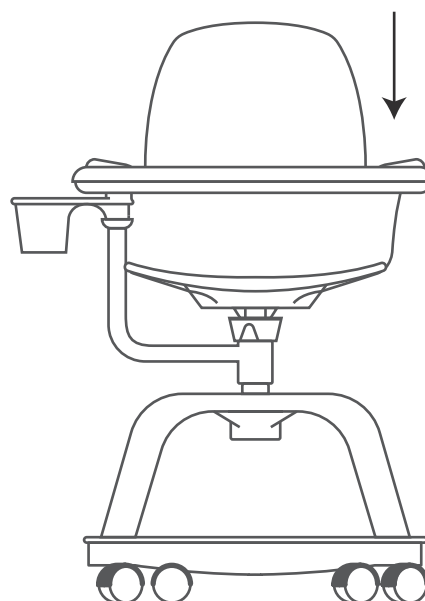

- 2** Place the worksurface arm on the top center of the base and push downwards by rotating the arm.

- 3** Place the protective cap.

- 4** Rotate the worksurface arm to the front side. Place the chair top on the base and apply force from above.

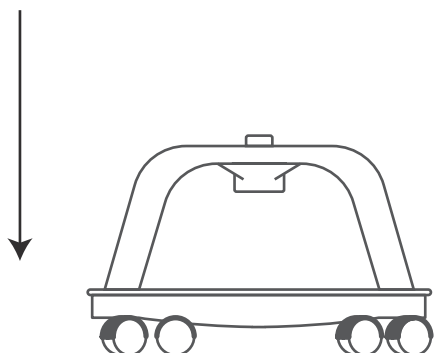

The resulting space between the seat and the base is not a defect and does not affect the solidity and stability of the chair.

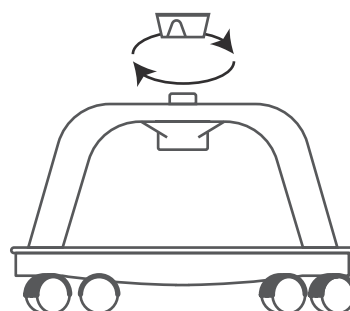

Assembly instructions

PKD1002

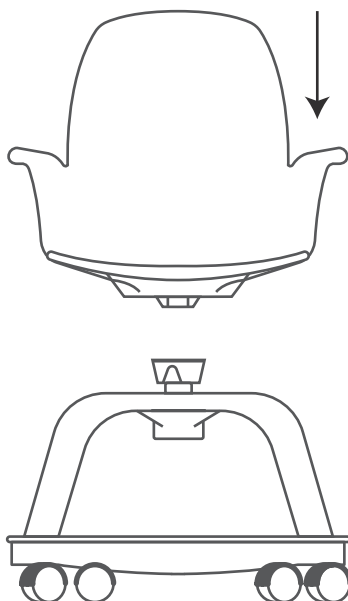

- 1** Stabilize the base on the ground.

- 2** Rotate the worksurface arm to the front side.

- 3** Place the chair top on the base and apply force from above.

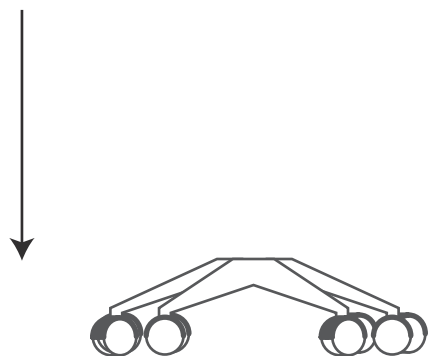

The resulting space between the seat and the base is not a defect and does not affect the solidity and stability of the chair.

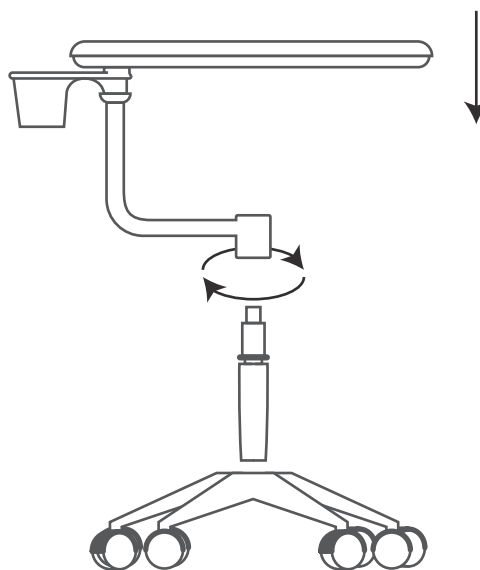

Assembly instructions

PKD1003

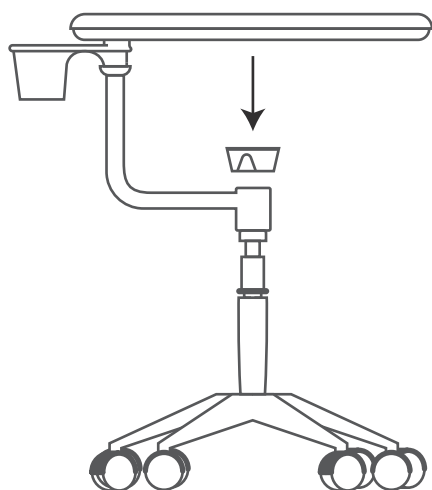

- 1** Stabilize the base on the ground.

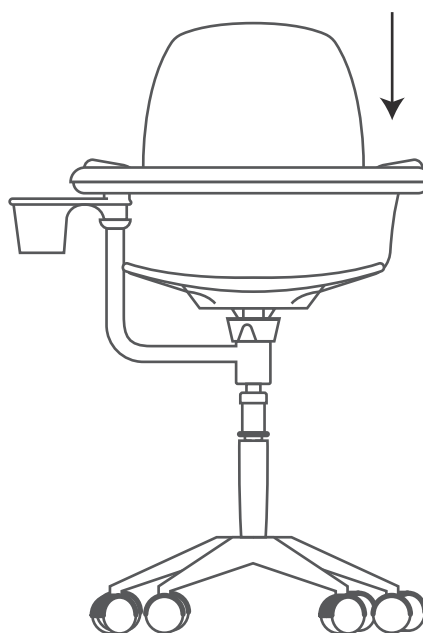

- 2** Place the worksurface arm on the top center of the base and push downwards by rotating the arm.

- 3** Rotate the worksurface arm to the front side. Place the protective cap.

- 4** Place the chair top on the base and apply force from above.

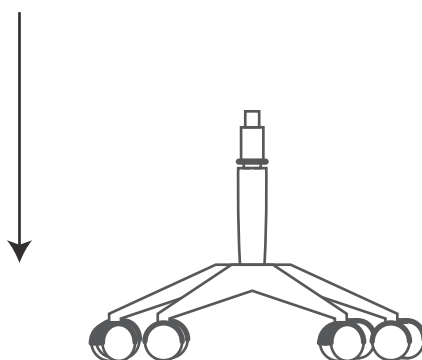

The resulting space between the seat and the base is not a defect and does not affect the solidity and stability of the chair.

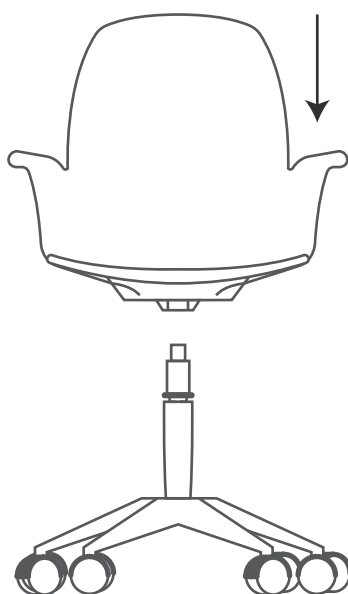

Assembly instructions

PKD1004

- 1** Stabilize the base on the ground.

- 2** Place the chair top on the base and apply force from above.

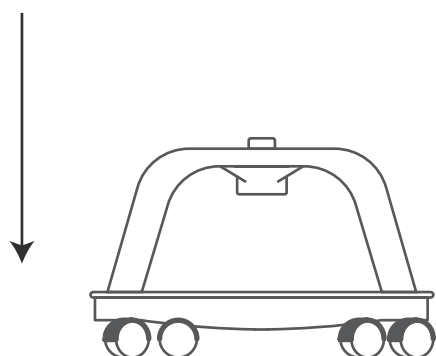

The resulting space between the seat and the base is not a defect and does not affect the solidity and stability of the chair.

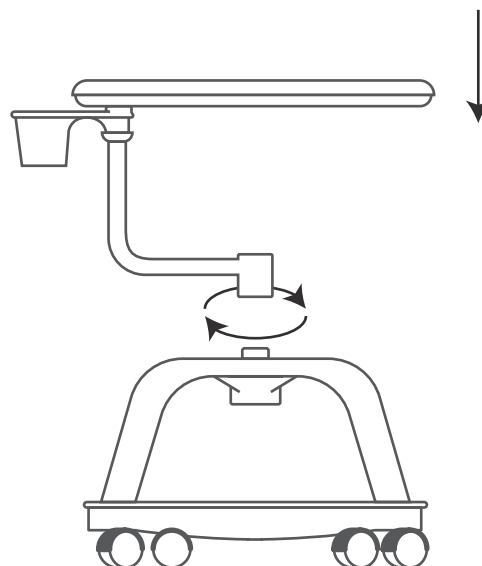

Istruzioni di montaggio

PKD1001

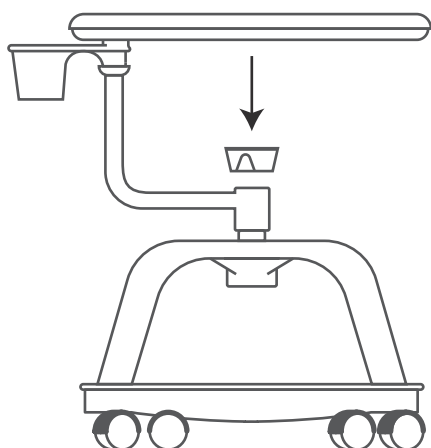

- 1** Stabilizzare la base a terra.

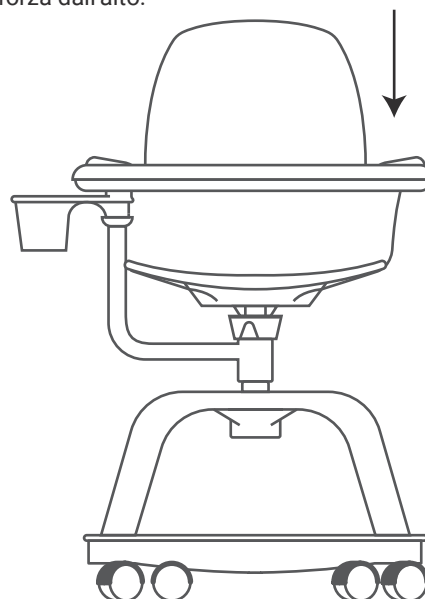

- 2** Posizionare il braccio della superficie di lavoro sulla parte centrale superiore della base e spingere verso il basso ruotando il braccio.

- 3** Posizionare il cappuccio protettivo.

- 4** Ruotare il braccio del piano di lavoro sul lato anteriore. Posizionare il piano della sedia sulla base e applicare la forza dall'alto.

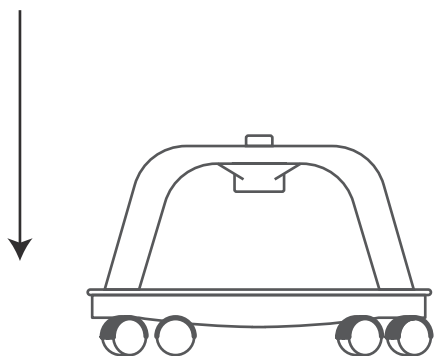

Lo spazio risultante tra la seduta e la base non è un difetto e non pregiudica la solidità e la stabilità della sedia.

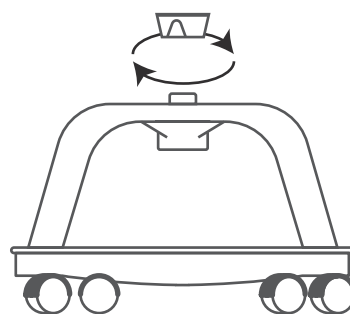

Istruzioni di montaggio

PKD1002

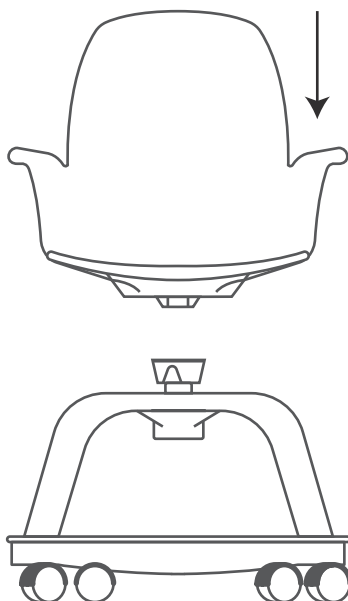

1 Stabilizzare la base a terra.

2 Ruotare il braccio del piano di lavoro sul lato anteriore.

3 Posizionare il piano della sedia sulla base e applicare la forza dall'alto.

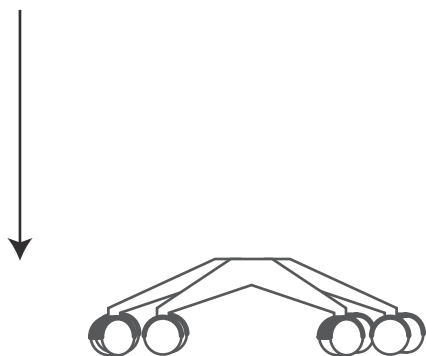

Lo spazio risultante tra la seduta e la base non è un difetto e non pregiudica la solidità e la stabilità della sedia.

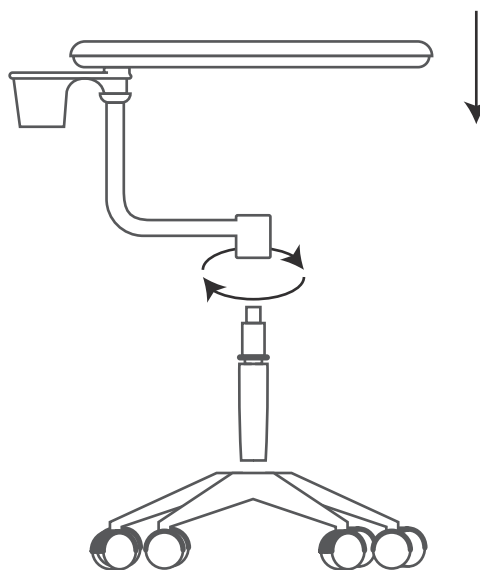

Istruzioni di montaggio

PKD1003
